

HOW TO MAKE A MINIATURE BOW & ARROW

1. Remove one craft stick from the water. Pat with the towel.
2. Unwrap some dental floss and wrap it around the two notches on one end of the craft stick. Tie a knot to secure.
3. Carefully bend the craft stick until it is in the shape of a bow and pull the dental floss tight. Wrap the dental floss around the two notches on the opposite end of the craft stick until secure.

4. Write the child's name on the bag and place the bow and 5 "arrows" in the bag.
5. To use, find the slit that has been cut at the rear of the "arrow" and stick the dental floss in the groove. Holding onto the end of the arrow with one hand and the bow with the other, pull back, aim, and fire!!
